Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claims 1 and 7, the "radiator fill port", "expansion tank fill port", "upper hose" and "upper engine port" are inferentially included as part of the claimed combination of elements rendering the claims indefinite as to whether the combination of the vehicle structure (discussed supra) and a fluid replacing apparatus or subcombination of a fluid replacing apparatus is intended to be claimed. Should applicant intend the "vehicle structure" to be a positive element of the claimed combination, then positive structural antecedent basis should be provided therefor. If not, the terminology "adapted to be" could be used (i.e., adapted to be interconnected...).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

- A person shall be entitled to a patent unless –
 - (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Camacho et al.

In regard to claim 7-10, the Camacho et al. reference discloses a "fluid replacing apparatus" 10 comprising a radiator "fill port" 25a, an "expansion tank" (unlabeled; e.g. overflow tank common on vehicles), "external tanks" (T1, T2), a "tank hose" H1, a "vacuum pump" P2, an "external pump" P1, and an "engine pump" (see col. 4, lines 53-56; i.e. when engine is running), as claimed.

In regard to claims 1-6, the method as claimed would be inherent during normal use and operation of the device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy L. Maust whose telephone number is (571) 272-4891. The examiner can normally be reached on Tue. - Thur. 6:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine R. Yu can be reached on (571) 272-4835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
